

QUICK FACTS

Founded In 2014

Best technology company in the Sacramento region, 2018

Founding member of the California Mobility Center

Featured in Comstock's Magazine Entrepreneur Showcase

Granted \$2.3 million from the California Energy Commission's Electric Program Investment Charge (EPIC) program

Granted \$1.5 million through the Public Interest Energy Research Natural Gas (PIER NG) program

ELECTRIFYING THE HYDRAULICS WORLD

At Terzo, we are bringing a new level of innovation and efficiency to the world of electro-hydraulics. Backed by two decades of research and development iteration, Terzo is building power solutions to turn a legacy industry on its head and putting the clear advantages of electrified power systems into practice.

Our commitment to revolutionizing the fluid power industry has led the Terzo team to develop the world's first and only electro-hydraulic system – the Hydrapulse[®]. This technology enables the electrification of the fluid power systems like hydraulic power units, auxiliary systems, compressors and much more.

VISIONARY ENGINEER, INDUSTRY DISRUPTOR

Mike Terzo, a mechanical engineer and graduate of Montana State University, set out on a path to develop and design a new, energy efficient electro-hydraulic pump nearly 20 years ago. He has since tested, experimented, veered off path, and early on, even coined the end of the week "blow-up Fridays" because, well, sometimes stuff literally blew up.

Now he's blowing something else up... the power industry itself.

- Six years of development and the 2014 launch of Hydrapulse technology and Terzo Power Systems
- Developed over 100 products for industrial clients as a recognized expert in manufacturing and hydraulic systems
- Design engineer for the first company to make ADA accessible pool lifts (His lifts dominate the global pool-access market)

Mike Terzo and his team are rewriting the benchmarks for performance and functionality while simultaneously disrupting an industry that needs to be turned upside down in order to build a sustainable future.

"Sometimes, standing out means standing for something and that can cause quite a bit of controversy..."

MKE TERZO, FOUNDER
